

# How to use FINNERO BALLERINA and BRENDA heat pants

Familiarize your dog with wearing the heat pants before her first heat

## How to pick the right size?

- Measure the girth of the belly and the crotch
- Make sure that the measuring tape is not too tight, but still tight enough (tip: keep your finger between dog and measuring tape)
- Heat pants are adjustable with velcro straps

## Wearing

- 1 Open the velcro tape on both sides
- 2 Insert disposable sanitary towel or paper towel in the pocket inside
- 3 Place the dog's tail through the gap first
- 4 Attach the velcro tape fastening to suitable tightness on the waist

## Washing instructions

- Wash the heat pants in cold (30°) water and hang to dry
- The heat pants are 100% polyester and will dry very quickly
- Do not use a tumble dryer

## Caution!

- Dogs should be supervised at all times while wearing the heat pants as they may attempt to eat the sanitary towel
- Use disposable sanitary towel or paper towel to prevent leakage
- Heat pants should be secure but not too tight
- Remove the heat pants for outdoor activities
- Remember to change the sanitary towel often to prevent infections and maximize comfort during the heat
